

Exercises

Here are a few exercises and challenges for you to tackle. I decided not to show the solutions to push you into the world of problem-solving and active learning. Plus, the solutions would be repetitive and a waste of your time.

- 1- Configure another OAuth provider, such as GitHub or Twitter.
- 2- Create a custom registration form that captures user's name, email, and password. Make sure these values are stored in the database.
- 3- Create a change password page. Make sure it's only accessible to logged in users.
